## LOW PROFILE BASE ALUMINUM

### 1. Swap Vises & Fixtures Quickly

A standard mounting pattern allows for easy movement of vises, fixtures, and tooling from machine to machine no setup time.

### 2. High Accuracy

Patented free float design ensures equal force on all 4 pull studs guaranteeing repeatability of less than .0005mm.

### 3. Standardize Your Setup

Stop building custom adapters and subplates for every new job that comes into the shop. Job changeover becomes simple and repeatable with the system, saving you time and money.

### 4. Easy Integration

Pull studs are easily integrated into existing fixtures and subplates. Standard 52mm and 96mm spacing allow for compatability with competitive systems.

## WELLOCK 5 AXIS MACHINE VISE

Fit well with 5 Axis MC machine center, horizontal and vertical machine center. It can work with rotary machine and related machine.

Vise body is made of steel SCM440. It has been carburizing heat treated to maintain the accuracy and precision.

Double-sided serrated jaws, clamping edge is required to be 3 mm, to save a lot material. The accuracy of repeatability within  $\pm 0.015\text{mm}$ .

Superior tool steel SCM440 jaw-plate has been carburizing heat treated the hardness to HRC54° for excellent stability.
